

Relation between Qassim University, College of Medical Rehabilitation
and DPT program missions

The Mission of Qassim University

Provision of a high quality, accredited education producing competent graduates who meet the needs of the labor market, conducting applied research and offering quality community services to develop the Qassim Region and to contribute to the building of a knowledge-based economy, achieving all goals by using the most advanced techniques in management, technology, and information processing, by fostering national and international partnerships, and by boosting the University's resources

College of Medical Rehabilitation Mission:

Providing advanced educational programs to prepare qualified health contributors in medical rehabilitation and provision of applied research and advisory services contribute to improving health care services and strengthen local sustainable development using the best strategies, techniques and strengthen partnerships nationally and globally

The DPT program Mission

Produce a competent graduate, who is able to practice physical therapy autonomously at the highest level of professionalism and ethical standards in the ever-changing health care systems, through providing an environment that is conducive to learning and scholarly activities that contributes to the health and wellness of society.

Relation between Qassim University, College of Medical Rehabilitation and DPT program missions

Qassim University mission has three basic themes which are:

First: Education:

The education offered by Qassim University must be advanced and fulfill the quality and accreditation standards to be academically accredited in its plans so that the University is able to produce highly qualified graduate in terms of knowledge, skills, ethics and technology, as required by the labor market and the community at large.

Second: Applied research

The University must provide applied research in the light of local development needs in the Qassim Region and in a way that contributes to the building of a knowledge-based economy for the region.

Third: community service

The University must provide distinctive social services in the light of local development needs in the Qassim Region and in a way that contributes to the building of a knowledge-based economy for the region.

These three themes are accomplished through creating a positive work atmosphere while maintaining the following standards and basics:

- Effective use of the latest managerial, technological and informational methods so as to raise efficiency and effectiveness and improve institutional performance,
- Effective use of strategic partnerships at local, national and international levels while maximizing the benefits for all parties,
- Development of human resources and attracting and retaining qualified personnel while ensuring that they achieve high performance and behave innovatively, and
- Bolstering financial resources and diversifying their sources

College of Medical Rehabilitation mission supports the same three themes as follows:

First: Education:

The teaching and learning: (Providing advanced educational programs to prepare qualified health contributors in Medical Rehabilitation)

Second: Applied research

Provision of applied research

Third: community service

Provision of advisory services contributes to improving health care services and strengthen local sustainable development.

These three themes are accomplished through, the use of the best strategies and techniques and strengthening partnerships nationally and internationally.

DPT program mission supports the same three themes as follows:

First: Education:

Teaching and learning: (Produce a competent graduate, who is able to practice physical therapy autonomously at the highest level of professionalism and ethical standards in the ever- changing health care systems).

Second: Applied research

Scientific applied research: through providing, an environment that is conducive to learning and scholarly activities

Third: community service

Community service: contribute to the health and wellness of society.

These three themes will be supported by providing an educational environment that is conducive to learning and scholarly activities.
